The end of the war in May 2009 has led to new development initiatives paving the way for further economic development. This study analyses the situation in the Eastern Province providing information on democracy, human rights and development. Knowledge attitudes and perceptions on the state of democracy in the East are examined through quantitative and qualitative research carried out by Social Indicator, CPA, and the findings summarized in this report.

Current Stock situation:	Limited Edition 350
Softcopy:	Yes
Library ACC No	6850/6851

This report highlights critical land related issues in the Eastern Province in the post war context focusing on the period 2007-2010, providing an overview of the situation soon after the liberation of the East, and covers their impact on governance and politics in the area. New land settlements, land grabbing and encroachment on state land, illegal land sales and the implication of the loss or destruction of land documentation is examined in the context of ownership access and control of land. The constitutional, legal and policy framework that governs the land in the region is examined.
